CERTIFICATE OF CALIBRATION

AEROCENTER
EPPS ATLANTA

Aero Center Epps Atlanta
1 Aviation Way
Atlanta, Georgia, 30341, United States
7704589851

Record Information

Certificate No: 5345-2
GageList ID: 5345
Instrument ID: A-1003
Serial No: 0423120498
Asset No:
Company: Advanced AOG

Gage Information

Gage Status - As Found: Active
Model: 2503MFRMH
Manufacturer: CDI Torque Products
Date Acquired: 06/04/2025
Procedure No: 02.01

Description: Torque Wrench 30-250 ftlb
Reference Standard: No
Shared Tool:
Customer Code:

Calibration Information

Interval: Scheduled (1 years, 0 months, 0 days)
Temperature: 66 F
Calibration Type: SCHEDULED

Humidity: 20%

Gage Assignment

Tool Location:

Assignee:

Calibration performed under the following environmental conditions:

Test No	Attribute	Nominal | Minimum | Maximum	As Found	As Left	Result
1	Clockwise	74 | 71.04 | 76.96 Pound (lb)	74.05	74.05	Pass
2	Clockwise	118 | 113.28 | 122.72 Pound (lb)	118.28	118.28	Pass
3	Clockwise	162 | 152.52 | 168.48 Pound (lb)	162.90	162.90	Pass
4	Clockwise	206 | 197.76 | 214.24 Pound (lb)	205.80	205.80	Pass
5	Clockwise	250 | 240 | 260 Pound (lb)	249.52	249.52	Pass
6	Counter-Clockwise	74 | 69.56 | 78.44 Pound (lb)	72.51	72.51	Pass
7	Counter-Clockwise	118 | 110.92 | 125.08 Pound (lb)	121.20	121.20	Pass
8	Counter-Clockwise	162 | 152.52 | 168.48 Pound (lb)	167.04	167.04	Pass
9	Counter-Clockwise	206 | 193.64 | 218.36 Pound (lb)	212.14	212.14	Pass
10	Counter-Clockwise	250 | 235 | 265 Pound (lb)	256.60	256.60	Pass

This Gage is within Specifications: (As Found) Pass - (As Left (overall pass/fail)) Pass

Gage is Fit for Intended Purpose: (As Left) Yes

Calibration Actions

Adjustments Required: No
Repairs Required: No
Action Required: No

CERTIFICATE OF CALIBRATION

Statement: The instrument on this certification has been calibrated against standards traceable to the National Institute of Standards and Technology (NIST) or other recognized national metrology institutes, derived from ratio type measurements, or compared to nationally or internationally recognized consensus standards. A test uncertainty ratio (T.U.R) of 4:1 [K=2, approx. 95% Confidence Level] was maintained unless otherwise stated. Lab Operations follow the guidelines of ANSI/NCSL Z540-1-1994, ISO/IEC/7025 NIST Handbook 150:2006, DAP-TM08 Rev 4.0 & NIST Tech Note 1297, 1994 All results contained within this certification relate only to item(s) calibrated. Any number of factors may cause the calibration item to drift out of calibration before the instrument's calibration interval has expired. This certificate shall not be reproduced except in full, without written consent of Aero Center Epps Atlanta Calibration Department

Review and Approval

Calibrated By: A MEREDITH

Calibration Date: 02/03/2026

Next Calibration Due: 02/03/2027

Gage Status - As Left: Active

Finalized By: A MEREDITH

Date Finalized: 02/03/2026
